This malformation, known as a lymphangioma, causes **Olga** multiple ailments. **Olga's** parents contacted our Foundation requesting help to operate on the little girl in December 2018. Thanks to Global Gift Foundation, **Olga** began her treatment and had her first operation. She is currently in treatment and the Foundation continues to support her in all the needs that may arise for her and her family.

## Khatira Sarwari

The latest action was the operation performed was on **Khatira**, a 13-year-old Afghan girl diagnosed with end-stage renal failure and, although she was on dialysis, her condition worsened.

Her mother, Shafiqa Sarwari, is a single mother who lost her husband to a suicide attack. She had to stop working to care for her daughter full time. The only hope for Khatira was a kidney transplant, with her mother as the compatible donor.

When **Maria Bravo** received this request for help, she put all her efforts in raising the funds for the operation that would save **Khatira's** life. Everything went well and after the operation, Maria traveled to India, as she wanted to meet Khatira and her mother, in the process of recovery. ## Program: Casa Global Gift

# Global Gift Foundation's Key Project

The president of the Foundation, **María Bravo**, had a dream of creating a space where children with special needs and rare diseases and their families could have a home where they could receive therapies and treatments, hence The **Casa Global Gift** project was born.

Over time, this dream became a reality, taking the form of a Center for the care of disabilities, rare diseases and disorders suffered by children in the city of Marbella and Spain.

The objective of the project is to offer a space to carry out therapeutic activities in Marbella and thus alleviate the difficulties that parents encounter when having to pay the high costs of private rehabilitation and travel enabling the child to receive specific therapies for their pathology.

In addition, the project will incubate local associations and charities that don't have their own space. This networking allows the associations to continue their work in support of these groups by offering them headquarters where they can carry out their activities in a comprehensive manner.

Although the works of the **Casa Global Gift** have not finished, we have been conducting children's workshops and rehabilitation therapies in other spaces:

## Year 2018

**Painting Workshop:** where the children, parents, volunteers and the Foundation staff enjoyed a morning of conviviality where they could express themselves through drawing and art. Together they drew a mural of gratitude to the Foundation and participated in different outdoor games.

# Year 2019

- **Special Yoga:** With yoga teacher Laura Marro from "My Special Yoga" and the participation of 6 children with their mothers, a very special afternoon was enjoyed in which the children remembered the importance of taking care of themselves and feeling well. Special thanks to the Radiant Yoga Center for giving us their beautiful room to do the workshop.
- **Children's art therapy:** During a fun session, 10 children were able to learn to express their emotions and physical state through art and games.
- **Teen art therapy:** 8 teenagers participated and enjoyed a morning with their friends expressing themselves as they are and putting aside fears and complexes through art.
- **Music therapy:** 11 children enjoyed a morning together laughing and learning to play different instruments, singing and dancing with teacher Laura Andrade in a space provided by the Marbella town hall.
- **Painting workshop:** 12 children spent a morning of laughter and games through paintings related to the marine world. Patricio Moreno was the artist in charge of guiding the session in a room provided by the "Manolo Santana Racquets Club" Sports Center.
- **Cooking workshop:** 9 children participated in an activity where they stimulated their senses through food, touching, smelling, tasting and cooking with healthy foods. Thanks to Casa Skulp (physiotherapy center) for giving us the space.
- **Christmas workshop:** Professor Patricia Llaveró organized different fun arts & crafts for the workshop where 7 children participated in a space provided by the town hall.
- **Casa Global Gift Presentation:** On July 12th, 2019 we took the opportunity to show the progress of the work to all our collaborators and Global Gifters during the Marbella Philanthropic Weekend. The children and families of the Global Gift House attended and participated in different activities organized together with the AVOI Association.

In addition to these workshops, Global Gift Foundation is preparing the following services:

- **Physiotherapy room:** the fundamental objective of physiotherapy is the evaluation and treatment of motor function to achieve the greatest functional potential and autonomy.

Through different state-of-the-art machines, minors can develop the mobility of the whole body to alleviate the difficulties associated with disability, helping with movement and promoting physical exercise that improves lung and respiratory capacity.

- **Sensory integration room:** In this room, children work on gross motor skills, the vestibular system and the proprioceptive system, helping them to learn movements that promote autonomy. This room is the only one of its kind in our region, and will be reviewed and supported by different unique professionals and experts in sensory integration as developmental therapy.

- **Speech therapy room:** where the speech therapist will be in charge of evaluating, rehabilitating and preventing language, speech, voice and swallowing disorders.

- **Multipurpose room** where innovative therapies such as neurofeedback or music therapy are developed and practiced.

- **Cystic Fibrosis Unit:** We will have a specific unit for the care of those affected by cystic fibrosis equipped with the latest technologies that help prevent infections that can affect their disease. Copper is a material with antimicrobial properties that kills up to 99% of bacteria that come into contact with its surface. 80% of the infections that affect these users are transmitted by contact, so with the installation of these panels we will be able to avoid a high percentage of contagion among those affected, enabling us to carry out the necessary therapies to improve their health

- **Outdoors:** There will be areas where we will be able to organize physical activity, games and sports. In addition, boys and girls will be able to participate in the cultivation and maintenance of various organic allotments. These types of activities are considered therapeutic because contact with nature improves the physical, mental and emotional health of minors, working on aspects such as stress, anxiety through integration with the natural environment.

- **Therapeutic pool for hydrotherapy:** Hydrotherapy is a form of physical therapy and is used for the treatment of various diseases and disorders, as it stimulates the immune system, produces muscle relief, reduces stress and facilitates breathing.
